OBJECTIVE

Software Engineering Technology student seeking a Fall 2026 Data Analyst internship. Bringing a strong foundation in database management (PostgreSQL, MongoDB), data querying (GraphQL, REST), and the complete software development lifecycle. Eager to apply problem-solving skills to build data pipelines, analyze complex datasets, and drive actionable business insights.

TECHNICAL SKILLS

Data & Databases: PostgreSQL (SQL), MongoDB (NoSQL), GraphQL, RESTful APIs, JSON, CSV data manipulation

Programming Languages: Python, JavaScript (ES6+), TypeScript, C#, Bash Scripting

Tools & DevOps: Git, GitHub (Version Control), Docker, Linux/Unix CLI, Agile Methodologies

Core Competencies: Data Analysis, Software Development Life Cycle (SDLC), Object-Oriented Programming, Problem Solving

TECHNICAL PROJECTS

Data Integration & Export System — *C#, CSV Manipulation*

- Developed a robust application feature for structuring, validating, and exporting user data into CSV format, enabling streamlined data organization and business reporting.
- Manipulated and organized complex data structures using logic functions to ensure accurate data retrieval and seamless integration with existing management systems.

SpaceX Mission Data Pipeline — *REST APIs, JSON, Angular*

- Engineered a data pipeline application to fetch, process, and analyze complex, large-scale SpaceX mission datasets via external APIs.
- Managed data flow efficiently, transforming raw JSON inputs into structured, actionable insights and user-readable formats.

Employee Database Architecture — *MongoDB, GraphQL, Node.js*

- Designed and implemented a scalable NoSQL schema to manage complex relational data for employees and corporate departments.
- Built a highly efficient backend API, optimizing data retrieval and significantly improving data efficiency by eliminating over-fetching.
- Maintained clean version control practices using GitHub throughout the SDLC, enabling efficient code reviews and testing.

EXPERIENCE

Starsky Fine Foods Inc.

Customer Service & Operations

Toronto, ON

June 2021 – August 2021

- Accurately managed high-volume transactions and maintained detailed logs of daily inventory, demonstrating strong attention to detail and organizational skills.
- Utilized strong interpersonal and bilingual (English/Polish) communication skills to resolve customer inquiries and collaborate effectively across functional team areas.

EDUCATION

Advanced Diploma in Software Engineering Technology
George Brown College, Toronto, ON

Expected 2026
