EDUCATION

George Brown College

Advanced Diploma in Software Engineering Technology

Toronto, ON

Expected June 2026

Relevant Coursework: Data Structures & Algorithms, Full-Stack Development, C# OOP, Database Management (SQL/NoSQL), Web Development, Linux System Administration.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), C#, Python, SQL, HTML5, CSS3, Bash Scripting, Polish (Bilingual)

Frameworks/Libraries: React, React Native, Node.js, Express.js, GraphQL, Apollo Client, Angular, Tailwind CSS, Bootstrap

Tools & DevOps: Git, GitHub, Docker, Linux/Unix CLI, MongoDB, PostgreSQL, Firebase, NPM/Yarn, RESTful APIs

Core Competencies: Full-Stack Development, Backend Architecture, Responsive Design, Linux Server Management

TECHNICAL PROJECTS

FITQUEST – Mobile Fitness Ecosystem | *React Native, Firebase*

2025 – Present

- Architected a cross-platform mobile application utilizing React Native and Firebase, enabling real-time workout tracking and persistent data synchronization for users.
- Implemented secure authentication and cloud-based storage, ensuring high availability and privacy for user-generated fitness metrics.

Scalable Backend Architecture | *Node.js, GraphQL, MongoDB*

2026

- Engineered a high-performance backend using GraphQL, reducing data over-fetching by 40% and optimizing API response times compared to traditional REST architectures.
- Designed a complex NoSQL schema in MongoDB to manage deeply nested relationships between organizational departments and employee records.
- Automated local deployment workflows using Docker and Bash scripts, significantly reducing environment setup time for development teams.

Professional Portfolio Development | *HTML5, Tailwind CSS, Git*

2026

- Developed a responsive, performance-optimized portfolio site using modern CSS frameworks to showcase technical projects and engineering competencies.
- Leveraged GitHub for version control and CI/CD best practices, ensuring a clean and maintainable codebase.

EXPERIENCE

Starsky Fine Foods Inc.

Toronto, ON

Customer Service & Operations

June 2021 – August 2021

- Managed high-volume transactions and daily inventory logs with 100% accuracy, demonstrating attention to detail and efficiency in fast-paced environments.
- Utilized bilingual communication skills (English/Polish) to resolve complex customer inquiries and support cross-functional team operations.

ADDITIONAL INFORMATION

Technical Interests: Linux System Administration, PC Hardware Optimization, DevOps Infrastructure.

Certifications: Currently pursuing professional certifications in IT support and technical roles.
